

## Save Norfolk's Animals

Last year 2,483 dogs & cats were killed at our City's shelter  
Norfolk Animal Care Center.  
Only 57% of our lost and homeless dogs & cats were saved.

# ANIMAL WELFARE VOTER INFORMATION

*Highest Rating = 5 paws*

### **Tommy Smigiel, Andy Protogyrou, and Rodney Jordan**

For the last several years, **Tommy Smigiel** and **Andy Protogyrou** have been the City Council's preminent voices for our community's companion animals. Both have advocated that the City support a higher save rate at the municipal shelter and the implementation of programs, such as comprehensive adoption and pet retention, of the No Kill Equation. Returning to City Council will give both more time to push for these proven programs and policies to save our healthy and treatable animals. Norfolk's animal lovers should feel confident in supporting Smigiel and Protogyrou for another term. **Rodney Jordan** has served the community as a school board member. Jordan has thoughtfully advocated for the humane treatment of Norfolk's community and stray cats, and he has seen first hand successes from the proven lifesaving program of TNR (trap, neuter and return). He has a genuine interest in increasing the outlook for our municipal shelter pets. He supports the implementation of proven programs and policies needed to achieve a 90% save rate at our City shelter.

### **Billy Cook, Jane Bethel, Marcus Powell, Michael Muhammad, Lionell Spruill, Glen Jones, and Mamie Johnson**

We appreciate the responses from these candidates. Each has a sincere interest in the outcomes of our lost and homeless pets. We like that **Jane Bethel** adopted Muggles, her cat, from Norfolk Animal Care Center, and with **Billy Cook, Marcus Powell, Michael Muhammad, Lionell Spruill, Glen Jones, and Mamie Johnson** there is solid support for programs needed to improve our 57% save rate.

**No Responses:** Paul Fraim, Theresa Whibley, Paul Riddick, James Driggers, and William Collins, Jr.

*These ratings are not endorsements and are based upon information received from the candidates. **No Kill Hampton Roads** seeks to end the killing of healthy and treatable animals in Hampton Roads' shelters, to reform animal control in our area and push for the implementation of the proven, cost effective policies and programs of the No Kill Equation which will save over 90% of the impounded animals in our municipal shelters.*
